Risk Factors for Testicular Cancer A risk factor is anything that changes your chance of getting a disease such as cancer. Different cancers have different risk factors. Some risk factors, like smoking and diet, can be changed. Others, like a person's age or family history, can't be changed. But having a risk factor, or even many, does not mean that you will get the disease. 4 Critical Risk Factors in Selling - Brian Tracy There are four main risk factors that contribute to the perception of risk in the mind of the customer. Risk Factor 1: Size of the Sale. The first risk factors that contribute to risk is the size of the sale. The larger the scale, the more money involved, the greater the risk. Four preventable risk factors reduce life expectancy in U ... They found that these four risk factors account for a substantial proportion of differentials in life expectancy among these groups. Southern rural blacks had the largest reduction in life expectancy due to these risk factors (6.7 years for men and 5.7 years for women) and Asians the smallest (4.1 years for men and 3.6 years for women).
